Name	Eleanor Glenn
Cornell Affiliation	BS '22, M.Eng. '22
Job Title	Founder
Company	Stealth Startup - AI
	Eleanor Glenn is a San Francisco-based Pear VC Female Founder. After reaching key engineering milestones as a spacecraft test and operations engineer at two venture backed satellite companies, she is now building AtmosOne AI, a geospatial decision intelligence platform for infrastructure --serving Utility leadership facing significant wildfire ignition risk and liability. During her time at Cornell, as an undergraduate and then graduate student in the Sibley College of Mechanical and Aerospace Engineering, she sharpened her entrepreneurial skill through coursework and programming with the SC Johnson College of Business, by hosting the 2021 American Indian Science and Engineering regional conference at Cornell as its President, and as the founding VP of Women of Aeronautics and Astronautics at Cornell.
